

Electrify America Announces Three Years of Complimentary 30-Minute Charging for All-Electric Genesis GV60

New GV60 Owners Provided with Complimentary 30-Minute Charging Sessions Accessible via the Electrify America Mobile App

Reston, VA (May 17, 2022) – Electrify America today announced an agreement with Genesis Motor America to offer three years of 30-minute complimentary charging sessions from the date of vehicle purchase for the fully electric GV60 to be released by Genesis. Owners of model year 2023 GV60 SUVs will have access to ultra-fast charging on Electrify America’s coast-to-coast charging network. Additionally, Genesis GV60 owners can seamlessly locate and access charging stations while on the road via the Electrify America mobile app.

“We are continuing to transform the ultra-fast charging experience for EV drivers through our collaborations with leading automakers” said Giovanni Palazzo, president and chief executive officer of Electrify America. “By offering three years of complimentary 30-minute charging sessions to new Genesis EV drivers, together we’re helping create an electric transportation future that benefits drivers and communities across the U.S.”

Charging benefits will be accessed through the user-friendly Electrify America mobile app allowing customers to locate a charger, initiate a charge and track a charging session. With charging speeds from 150kW to 350kW – the fastest charging speeds available today – Electrify America’s ultra-fast network will enable owners of the Genesis GV60 SUV to charge with confidence.

“As we take steps into our fully-electrified future, Genesis is pleased to be collaborating with Electrify America to deliver convenient charging solutions to our customers,” said Claudia Marquez, chief operating officer of Genesis Motor North America.

Electrify America continues to drive EV adoption forward while building driver confidence by rapidly expanding its fast-charging network, which currently has 800 charging stations comprised of about 3,500 individual chargers open or with construction completed.

About Electrify America

Electrify America LLC, the largest open DC fast charging network in the U.S., is investing \$2 billion over 10 years in Zero Emission Vehicle (ZEV) infrastructure, education and access. The investment will enable millions of Americans to discover the benefits of electric driving and support the build-out of a nationwide network of workplace, community and highway chargers that are convenient and reliable. Electrify America expects to have more than 1,800 total charging stations with over 10,000 chargers in the United States and Canada by 2026. During this period, the company will be expanding to 49 states and the District of Columbia, delivering on its commitment to support increased ZEV adoption with a network that is comprehensive, technologically advanced and customer friendly.
